INTRODUCTION

Management is in general optimizing the outputs of the different production factors – raw materials, people, money and infrastructure. None of the other three production factors can function without the factor of people or human resources. In a complex and competitive society Human Resource Management is vital for operational success. The Bachelor's in Human Resource Management program is intended to prepare 21st century graduates with exceptional, knowledge, skills and competencies. The graduates will be equipped with the ability to identify, analyze, and solve complex human resource and management issues for changing organizations

WHO SHOULD ATTEND

Both direct and indirect entrants with a desire to enter this exciting field or to improve their knowledge.
